Tshwanw University of Technology

Ndip, Computer Systems Engineering | Jan 2016 - Nov 2021

- Studied software development, Systems Analysis, and Software Engineering.

Shingwedzi High School

Matric 2015

**DIGITAL
ACADEMY**

**MATIMBA
CHAUKE**

During the 6 month period of the IT: Systems Support learnership programme at The Digital Academy **Matimba** and his team created a mobile application called **Smart-serve**.

Matimba's main responsibilities on the project were working on the creation and functionality of Logins by using NodeJS, PostgreSQL and JavaScript as well as working on the APIs for the dashboard.

I would have no hesitation in recommending **Matimba** as a Junior Software Developer. He is an adaptive individual who readily faces new challenges head on. His technical ability coupled with his eagerness to learn makes him an asset to any team.

SOFT SKILLS

Matimba's most improved competency:

interpersonal skills

These are skills which are used near-constantly as one interacts and communicates with co-workers and management.

TECHNICAL SKILLS

Primary Skills

TypeScript
Angular 2+
HTML

Secondary Skills

GIT
NestJS
MongoDB

Smartserve

Problem Statement

Many people spend a large amount of time working, and not attending to their errands and other minor responsibilities. This has a detrimental effect on their lifestyle. How can we solve this using technology?

Solution

Smartserve allows service providers to post micro-tasks for errands. Runners can be able to pick up those tasks and errands on behalf of service providers, thus getting remuneration for their errands on behalf of service providers.

Landing Page

New users to the application are required to create a new account by signing up and existing Users can simply Login to access the application.

Home Page

Once the User has registered, they will be redirected to the Login page where they will need to fill in their credentials.

Service Providers

Service providers are able to view the various tasks available. They can then select the task they can complete. Each task has a description and payment information displayed.

Task location

Once the task has been allocated and confirmed, only then will the location be provided.

Admin Dashboard

The Admin can monitor the relationship of the runners and service providers, their ratings and also activate and de-activate their profiles.

Runners

The runner can see from the types of tasks that are available and their pricing, they can also check their earnings and job history.

Faculty of Information and Communication Technology

Department of Computer Systems

To whom it may concern.

RE: EXPERIANTIAL TRAINING FOR DIPLOMA

I hereby wish to verify that Mr M Chauke (Student nr. 216650450) is a student at Tshwane University of Technology for the course

N. Dip. Engineering: Computer Systems

He has successfully completed all the theoretical subjects for the diploma.

Experience in the workplace is an invaluable part of the training and would be of great benefit for later employment, as well as opportunities in the Computer Systems Engineering field. Thus, he has to complete 2 X 24 weeks of training in the workplace as part of the subjects Experiential Training 1 and 2 in order to complete the curriculum of the qualification.

My best wishes accompany this letter.

Regards

A handwritten signature in black ink, appearing to read "Muwanguzi".

Mr. M.N. Muwanguzi

Lecturer: Computer Systems Engineering
Faculty: Information and Communication Technology
